DEPARTMENT OF THE AIR FORCE
HEADQUARTERS FOREIGN TECHNOLOGY DIVISION (AFSC)
WRIGHT-PATTERSON AIR FORCE BASE, OHIO 45433

REPLY TO
ATTN OF: LNC (Mr Domalski (513) 257-2956)

8 August 1979

SUBJECT: Distribution of OIA Reports Within FTD (U)

25X1 TO: CIA/OIA

1. (U) Prior to assuming the position of OWI liaison to FTD, I asked to be put on distribution for OIA reports dealing with aircraft, radars, strategic and tactical missiles and weapons production/test facilities. Since arriving at FTD, I have received almost 30 reports dealing with these topics and have personally distributed 21 of them to interested FTD analysts. In all cases, the recipients were delighted to get these reports and said that they could use the information they contained.

2. (C) The largest number of reports distributed has been to FTD's photo analysis shop. The office symbol for this shop is FTD/SQHA and there are 37 photo analysts working there. The function of this group is to support FTD personnel working in the field of weapons system analysis. The primary topics followed include aircraft, strategic missiles, electronics, PRC missiles and production/test facilities. Since the work that is done is exclusively in support of FTD analysts, photo analysis products are not distributed outside of FTD. However, titles and control numbers are entered into the national photo data base and reports can be ordered either through me or from the people who maintain the data base.

3. (C) Even though OIA cannot receive the FTD photo analysis product directly, your office may still wish to distribute its products to FTD. If so, reports should be addressed as follows:

- aircraft (Mr James Schutt)
- electronics (Mr James Hebert)
- USSR strategic missiles (Mr Ron Harper)
- PRC missiles (Capt William Harlan)
- production/test facilities (Mr Frank McPeak)

4. (C) The other recipients of OIA reports work in FTD's Directorate of Systems and Directorate of Technology and Threat. These organizations produce all-source, finished intelligence on current foreign weapons systems and projected (future) systems, respectively. The work they perform is very similar to work done by OWI and OSI for NFAC. The OIA reports received by persons in these organizations enable them to get outside opinions on topics they are interested in. To date, I have gotten "thank-you's" for circulating these reports, but have not yet received any substantial feedback on them. If I ever do, all comments

USAF review(s) completed.

will be forwarded to the appropriate OIA analysts.

5. (U) My primary function at FTD is, of course, to support OWI. However, as my time allows, I am available to assist OIA in its dealings with FTD also. If I can be of any assistance, I can be reached at the following numbers:

OWI Liaison to FTD
